I have a sports game, where a team wins by 3 goals. I have a relation of users, a relation of players, and a relation of games. There can be situations where a game ends in a draw, but I would like to consider this as a tie. In my model for a game there is a flag type for the tie. Example Team A | Team B | Game | Type | Player | ... | Game In the example there is the team A, team B and a game. But the game can also be a tie. In this case I have something like this Team A | Team B | Game | Type | Player | ... | Game My question is how can I generate a list with all possibilities for a given team? in this example the outcome should be something like this 1. Team A | Team B | Game | Type | Player | ... | 2. Team A | Team B | Game | Type | 3. Team A | Team B | 4. Team

If you want to play it on mobile or tablet, make sure you check our mobile guides to get the Total War: Warhammer II Free Download for different platforms. This is a turn-based strategy game, and it doesn't really get better than that. When you compare it to the other titles in the genre, it's very refreshing, and even in the recent and previous years, we've seen a wide array of genres and different games. Total War: Warhammer II Free Download What makes it even more unique is that it features the World War II setting, which is a nice change from the other games. As you can see, you don't have to worry about the medieval fantasy setting anymore, as we make it just like the World War II. Like we mentioned earlier, you can expect Total War: Warhammer II Free Download to be a highly entertaining experience, and you won't
