About This Game

From the people who brought you Skater, which reached #1 sports game world-wide for mobile, Skater XL is an evolution in skateboarding games.

Experience unparalleled board control and responsiveness while you skate legendary real-world skate spots. Style your tricks the way you want, from the way you flip the board to the way you move your feet. Feel connected to your board like never before.

Style and Control: With new ground breaking and intuitive controls, skateboarding in a video game has never felt more authentic, fluid, and responsive. Style tricks any way you want and make every trick and line your own.

Legendary Spots: Shred real world legendary skate spots, like the LA Courthouse which is featured in early access.

IMPORTANT: This game **REQUIRES** an Xbox 360, One, PS3 or PS4 compatible controller to play. There are **NO** keyboard controls available. It also requires a DirectX 11 or above graphics card.

Title: Skater XL
Genre: Action, Indie, Simulation, Sports, Early Access
Developer:
Easy Day Studios Pty Ltd
Publisher:
Easy Day Studios Pty Ltd
Release Date: 19 Dec, 2018

a09c17d780

Minimum:

OS: Windows 7

Processor: 2.5GHz dual core i5 or higher

Memory: 8 GB RAM

Graphics: GTX 950 or higher

DirectX: Version 11

Storage: 5 GB available space

Additional Notes: Please drop quality settings if not seeing 60FPS. This game is best played buttery smooth!

English

tech demo. Is this game getting more skate parks? I love the mechanics but the one skate park gets dull pretty quick having options is always great. Overall I enjoy the game, Just needs more places to go, plus i had to start the game 4 times before my controller would work dont know what was going on there. It works everytime now though.. Only one shoddy map and having to spend at least an hour sorting out mods to have something decent to play. Development team only posting videos of people pulling off tricks and haven't shown any progress in months. Very buggy & minimal content at best, as well as the gameplay being bad compared to Skating games of the past. Community is active and maps are available, but for the bugs, poor gameplay and lack of updates... Just get a 360 on the cheap and a copy of Skate 3. Really wanted this game to be something great but 6 months into early access and it's CURRENTLY a disappointment.. glitchy and boring. worth \$5 max in its current state. I don't skate irl but have grown up playing all the Tony Hawk/Skate games, this coupled with old THPS soundtracks and cant help but reminisce. Skater XL plays a bit more like Skate (in a good way). Can be kind of buggy as you sometimes fall without doing anything, but most of the time works fine. Being early access though I figured there would be more issues. I'm just relieved we finally have a company working on a modern skating game. Skater XL shows such promise and I hope when its "live" we get some detailed customization options and a chance to play online with at least a couple friends. Would also be nice to have different camera angles and a record option to show off tricks. Regardless of its issues, I'm stoked to see what Easy Day Studios brings us!. A skaters dream

This game is amazing!!!! It's more like a skating simulator than a game which is the highest praise. Controlling each foot with the thumb sticks feels very intuitive once you get the hang of it. Because it's difficult to land a great trick, it's super rewarding when you do. Unlike other older skating games that were "push A for a kick flip" type games, this makes you work for it. I love it!! Can't wait for more updates/the full game to be released.

Also, super cool proactive modding community.

100% recommend this to anyone even considering purchasing it.. This game is worth the price, it's very easy to add maps or alter the appearance on your character. You can also do some steazy tricks and the grinds look good if the board or trucks connect with the surface. From a very bad skater's perspective this game has everything I want to do in real life but it's less painful but not as rewarding as it is to land something in real life but it's ok it just makes me want to land it in real life instead. The only thing this game really needs is multiplayer. I still recommend it to anyone who likes skating.. It is a great game for being early access if you use mods but without that it is really boring because you only have 1 map. The mod community is really active and makes a lot of maps and clothes. It also isn't that intense it's really for laid back gaming if you just want to relax.

. 20 dollar demo. Haven't heard a single thing from the devs since I bought it. To top it all off it started to crash when I started it up every time, I see a million threads about it, and no fix or comment from the devs on any of them. Most people that had that seem to have given up and refunded. Wish I never bought this game.. cool game, great concept, mine is glitchy as hell tho, tried playing it for about 25 min until I realized it's really buggy, my skater would fall randomly at least 5-10 times before I was able to try actually skating and the tutorial page wouldn't work at all. sucks bc I was hyped to play this game.. Is really good, enjoy it more now since went to skaterxmods.com have way more maps to play, anyways guys PLEASE ADD LATE TRICKS ... late flips, late shuvs, darkslides ... stuff like that. and grabs or I haven't found out how to do grab. although PLEASE .. late tricks. Best skateboarding game to exist in the last 10 years.. I always loved and played the games in the EA Skate franchise. Loved the controller scheme and with Skater XL, it took the controller scheme and made it 10x better. I can't think of any other words to use than I love this game.. I can and will KILL hours on this, the glitches are hilarious and minor to me, creative and innovative! please keep updating!! 10/10
