About This Game

The Zoo is expanding!

More than 30 new types of animals and plants have moved in at the zoo. Favorite species such as the Wolf, the Arctic Fox, the Giant Kangaroo and the Meerkat are the new Stars in your zoo! Improve the park with the blossoms of sunflowers and rare orchids and plant exotic trees such as bamboo and eucalyptus.

Entertainment for all

You can use numerous new attractions for the perfect park experience. There is something special for everyone: from the children's adventure playground to the helicopter round-trip to diving in the shark cage. Visitors can travel through the park in boats, Jeeps or on the back of horses, camels and elephants. Or how about a dive to the newly constructed coral reef?

On the tracks of the Animal World

Of course the animals are the real protagonists! The new additions to the zoo show off their stunts and even challenge the guests of the zoo to a little duel: the courageous visitor can face the kangaroo in a boxing match. Enthusiastic water-babies are given

the opportunity of swimming with dolphins and turtles - go get wet! Inquisitive visitors can track the zoo inhabitants in the wild, observe them and capture them on film. But be careful: in case of an emergency the player has to personally intervene as Zoo Director, search for an escaped animal, sedate it with a tranquilizer gun and take it back to its safe environment.

Advanced park economy

To keep the cash coming in and to ensure that expensive novelties can be paid for, supply your visitors with culinary and cultural delights at booths and stalls: tired guests enjoy a steak at the BBQ Stall or refreshments at the Pool Bar. Street musicians, a clown and a juggler provide fun entertainment. A room at the Zoo Hotel turns a visit to the Animal World into the ultimate all-round enjoyment.

Turn a visit to the zoo into an unforgettable holiday experience for your guests!

I Bought Zoo Tycoon Instead!. THIS GAME IS THE\u2665\u2665\u2665\u2665. I liked this expansion pack. It has a lot of fun animals, buildings, and decorations.

My only complaint is the maps. There are not very many of them and they all have challenging weather which can be a hassle (especially if you are trying to keep plants alive). Most maps do not have a lot of precipitation which means the gardener constantly needs to water them (and he doesn't do a good job). They are also either really hot or really cold. My plants always end up dying.

The expansions for WLP2 don't tie together very well. For example, if I wanted to play Farm World, I could still get the Crazy Zoo animals, but that's it. None of the plants, buildings, or decorations would transfer to the other expansion, which is kind of annoying.

Also the icon is a creepy looking clown.. I like the game because there are a lot of different things to build and you also have different places (Desert, Mountains, etc.)

Good thing about this game is also that you have 20 different animals at the start. The only things I did not like were moving camera, rotating things, Mountains and doors for cages, but I still think that this is good game and I would recommend it.

. i like this dlc not bad ive got all them and i really like this game better then zoo tycoon 2

This game and its expansions are so nice to play. The challenges are fun and the graphics are amazing. I've played several zoo games and this one may not be the best but it's not the worst either. It adds elements of realism that many other zoo games don't such as caring for the plants as well as the animals. The guest, animals, and plants all react to the change in weather rushing for shelter or getting grumpy about it. I will also warn though for squeamish or younger players that in this realism they do show the animals jumping to conserve offspring and inbreeding are possible if not selling or separating the animals. Overall great game!. such a fun game. Absolutely Amazing Zoo Simulation\tycoon definatly better than ZT2. I like the game. But i dont like the notifications please have an option to remove them. At first I did not want to buy any of the wildlife park 2 DLC in case I would not like the game so I did not buy the bundle. Also I had previously read that each DLC is like a seperate game. Each with different animals and content. So was discouraged from buying DLC. But now that they have enabled all DLC to be merged and played in freeplay mode it is definitely worth getting. And after playing the original wildlife park 2 for over 25 hours I had to get crazy zoo as I must have wolves, artic foxes and Australian animals as wolves are one of my most fave animals along with foxes hence my user name.

And for those saying they aren't sure how to play, make sure you get the original wildlife park 2 as the first 4 missions for that game are a tutorial which explains how to do most things except build the horrible marine environments.. such a fun game
